I made one additional change to the prior version of Tanya's which incorporated your tweaks. The last line of the narrative summary had the date range for last year's bill, so I updated it in this version.
Let me know if you have further comments or if you concur and this is good to go.

This is the final version of the billing package (with my "changes accepted" to the letter/narrative), giving new file names (in accordance with the new oversight bill file naming convention) to the billing letter & narrative, the SCORPIO\$ report, and the Bill for Collection. This is the file name to use when saving the final version of the letter/narrative to the G drive subsequent to the bill package having been sent (G:\ERRDDIV-NY\Bills For Collection\MS Word version of Bills mailed).
Contact me with any questions.
